BUSINESS STRATEGY

Our fundamental business strategy is building long-term client relationships. With more than 30 years in the door industry, our focus on developing collaborative relationships with clients, developers, architects, general contractors and suppliers is reflected in the repeat and referral business that makes a significant percentage of our annual turnover.

At the same time we use this maturity and resource to meet the needs of private individuals who choose our hydraulic or bi-fold door solution for that once in a lifetime personal hangar project.

COMPANY FACT SHEET

WHAT WE DO AT AERODOOR™

Design & Manufacturing

Much of the difference between a well designed and engineered door and a commonly manufactured one is not immediately visible to the eye, yet has a significant impact on the performance, longevity, maintenance and function of the unit.

AeroDoor design every door, using structural and mechanical engineering practices to deliver a safe and strong door solution with minimum in life service cost.

If it's a hangar door or a specialist door system that you need; our engineering team and project managers have the knowledge and experience to work with homeowner, architect, engineer or contractor.

AeroDoor carry 30-years experience in the manufacturing and supply of doors to some of the worlds biggest companies, on projects that require an appropriate door system delivered to meet stringent quality criteria. Our rewards are measured by a high percentage of repeat business from companies that include NASA, Disney, Boeing, Lockheed Martin, Harris Corporation and Piper.

All design, manufacturing and office operations are completed from our 25,000 Sq/Ft facilities in Apopka, Central Florida.

Consultancy Services

If you need a structural, engineering or mechanical survey and inspection on an existing hangar door or specialist door system, AeroDoor can help.

If you're looking for a company to execute the safe removal of existing doors and install new doors, AeroDoor can help.

Delivery, Installation & Commissioning

For door installations in any global location, AeroDoor can utilize it's own accredited engineers, to fulfill all structural, mechanical and electrical duties. No door is too big, too small, too close or too far away.

2036 Apex Ct., Suite A • Apopka, FL 32703 • T: 407-654-0591 • Fax 407-464-0893 • Toll Free 866-226-3667

Delivery, Installation & Commissioning Continued ...

If preferred, AeroDoor can offer a supervised installation service, whereby a single AeroDoor engineer and erector, work directly with the clients own install crews. The final commissioning and testing of the door would still be fulfilled and recorded by AeroDoor.

If a client has their own team of erectors, then AeroDoor can offer a “supply only service” and installation can be fulfilled by others.

Please note, all hydraulic doors and one-piece hydraulic doors are designed and delivered to be straightforward and easy to install. Every hydraulic door includes step by step instructions with illustration and a copy of AeroDoors Health & Safety Manual for 2011/2012.

Door Maintenance, Service & Repairs

Save yourself time, money and resources. AeroDoor doors are designed to simplify maintenance. We achieve this by designing doors that are strong, robust and include many zero-maintenance components.

For routine inspections, servicing and repairs AeroDoor have a crew of field engineers who can respond to your call and deliver a professional and swift response.

AeroDoor can service, repair or upgrade doors that were not manufactured by AeroDoor too. If you have a hangar door or a commercial door, made by others then download our hangar door service guide at www.aero-door.com or contact AeroDoor.
